I have only tried one other editor and that was the Sony Vega and as well as this being cheaper (waaaay cheaper) it also was easier as well as has a few features i like. now i am not saying its the best of the best but for quality for the price this is the editor of any new youtubers dream. as well as for youtube im also able to record just the screen so it comes in handy as something to fiddle with.. I love the software its easy to use cheap and for a beginner in recording its exactly what i needed. But has more options than some of the other beginner softwares. Good software, auto renew doesn't work. Dont want to keep paying \$15 every month. I love this editing program, I know its 10 euros a month, but I have with all my accounts above 500+ hours, and use it every day, I can recommend this if you like easy to use program and have many options, and you can make perfect videos.

I will make a change on here... Before Camtasia Studio leaves steam.... I wanna give a review on this editing software, if you are new at editing. Then you should use this program, it is so simple to use and even when you are an advanced user, then its still really good to use, I can surely recommend it, and Im sad that you wont be able to buy it forever on steam, but an only subscription... But for sure go for it if you are a new editor and want to learn the edit world better! I have actually used this program since 2010 and still does, its so fantastic and hope you will give it a try, but from June, its only available on Their official website, then you have to go to Techsmith official site and buy it... Im going to miss it on steam.

But after my opinion it's really the best edit software to use, and I have done so many lovely things with this software, and Imma be really sad when it's gone on Steam, since I dont really want to pay 140 dollars on their site for it, would rather give 10 euros every month in the long run, but they might not sell too well, guys GIVE IT A TRY! :D

If you have problems to renew it, you will have to add wallets to be able to still use it, then account details and go to "resubscribe" on the subscriptions, I was lost at the beginning but learned it fast, and now... I'm just really happy it works now! Just so sad they wont keep it on steam still, but well... Yeah it sucks!

60fps videos? You will need to go to Techsmiths official website and download TSCC\u00ae Code, then it should work if you go into the settings soonest you have made your project.. I would reccomend it but not a monthly subscription..... WHAT? I HAVE TO RENEW IT AFTER A SHORT TIME? what the heack. ITS a good software but really? NOT RECOMENDED. Beautiful app, easy to use and easy to activate! It needs fresh install, if you are using old or crack version of camtasia then there will be activation or watermark issues. You need to undo crack and host file and then uninstall and then reinstall using steam and everything works charm. The only issue is that is not available for mac.. how do i cancel my payment of this product?

No option to re start my subscription, i click add to cart, it doesn't work since ive already purchased previously, but isn't showing up in my games/software library.

But when it was working, best editing software I've found so far!. You really should be offering licenses for the current version to current subscribers who've had a continuous subscription for (x) months. I know my monthly payments would have paid for a full version and then some, so it feels like a real kick in the nuts to receive this notice. Getting this notice and reading what amounts to a shrug and a "get your\u2065\u2065\u2065\u2065\u2065and get out". Once I get my hundreds of hours of content somehow out of the proprietary format you guys use, camtasia will never be installed on any of my computers, free or not.. Camtasia over-all is a great piece of software, allowing for quick recording and editing, sadly they have decided to remove their SAAS licence and gone straight for their yearly licence. As a user who was happy to pay \$10 a month, the moving away from their Steam customers and back to their original services saddens me.. well no, i paid fifteen bucks for this software, and i got a THIRTY DAY TRIAL, it really made me angry and i want my money back, so no i do not recommend it, a full 15 bucks wasted, and i bought it from here too, thinking i got a deal! heck no, do not buy this, unless you want to keep renewing it every couple of days with 15 bucks, thanks for your time :D. I purchased the monthly subscription yet they don't let me render my videos without the watermark. I am genuinely shocked. I payed money to use a demo.. Love Camtasia and monthly subscription, but now they're stopping the monthly subscription to steam customers I will be looking for an alternative screen recording software. Bad move for Camtasia
