Memory: 4 GB RAM

Graphics: 512 MB (GeForce 8800 GT / Radeon HD 2900 PRO)

DirectX: Version 9.0c

Storage: 1 GB available space

Sound Card: DirectX® 9.0c compatible sound card

Additional Notes: Game stability is not guaranteed on Intel HD Graphics and AMD HD Radeon on-board graphics cards

English,French,German,Japanese,Russian,Simplified Chinese,Thai

Pros : Looks better than most Drifting only games. Sadly dose not drive like most drifting games. Controller feels wonky and keyboard was used. Did not enjoy the short time I played.. Its ok game! Grapfic interesting. No "players" on multiplayer,(my opnion) worst controls ever!. You guys need to tweak your game very hard -- its impossible to drive!. The controls and speeds are not even any good -- You always spin out and cant even maintain a drift. The speed always lowers when pressing spacebar or down arrow (brake) and wont let you keep said drift for very long. Don't recommend. I am a drifter in games but this game is not a drift game. It's basically powersliding.

worst physic i ever seen and point doesnt take count of neither angle speed etc. penalty for wall tap but not for spinning out
