solution manual plus answer book and be available in the  
future.[Diagnostic value of endoscopic examination in  
terminal illness]. In many chronic diseases that restrict  
the vital functions, the ability to diagnose and treat them  
is limited to the palliative phase. In some cases, a greater  
understanding of the cause and a more precise  
assessment of the relevant risk factors at the time of  
early diagnosis leads to substantial improvements. In  
such cases, endoscopy is essential for both diagnosis and  
treatment. Yet, endoscopy can only be performed in  
patients still of good general condition. This article  
discusses the characteristics and current use of  
endoscopy in terminally ill patients. Quasiparticle density  
of states and electron localization in two-dimensional  
semiconductor super
